To achieve advanced English proficiency (TOEFL 90+, IELTS 7.0+, PTE 65+, Cambridge C1/C2 185, DET 120+), learners must develop high-level competence in four essential cognitive dimensions: (1) Syntactic deciphering of complex compound-complex sentence structures; (2) Semantic agility with nuanced low-frequency academic and idiomatic vocabulary; (3) Discourse synthesis and inferential reasoning; and (4) Stylistic sensitivity to register, tone, and rhetorical defamiliarization.

Chapter 1: Night City and the Broken Cowboy

Ch ng 1: Ph m v G€ Cao Th• Sa C

Narrative Synopsis (English)	**T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)**
Henry Dorsett Case drifts through the neon-drenched underworld of Night City in Chiba, Japan. Once a gifted console cowboy capable of navigating the consensus hallucination of cyberspace, Case was caught stealing from his corporate employers, who injected his nervous system with wartime Russian mycotoxins, irreversibly cutting him off from the matrix. Consumed by suicidal nihilism, he operates as a petty hustler selling contraband memory chips and stolen hardware. In the Chatsubo bar, served by the monofilament-prosthetic bartender Ratz, Case senses a lethal contract out on his life. His former lover, Linda Lee, warns him that a predatory crime boss named Wage is seeking his death. Instead of Wage's hitmen, Case is intercepted by Molly Millions, an augmented 'street samurai' with mirror lenses surgically sealed over her eye sockets and retractable four-centimeter razor blades beneath her burgundy fingernails. Molly escorts Case to a hotel to meet her enigmatic employer.	Henry Dorsett Case v t v ng trong th gi i ng m ng p tr n nh €n neon c a Night City t i Chiba, Nh t B n. Thematic & Critical Dissection (EN & VI)

Key Themes: Alienation and Bodily Disillusionment: Gibson establishes the central cyberpunk dichotomy between the 'meat' (the physical body) and the disembodied freedom of cyberspace. Case experiences the physical flesh as a prison and an insult, feeling amputated from the digital matrix. The noir atmosphere of Chiba underscores transnational capitalism, technological decay, and existential despair.

Consensus /k n s ns s/	noun	s ng thu n, nh t tr	Def: A general agreement or collective opinion. Ex: Cyberspace is famously described by Gibson as a consensus hallucination experienced daily by billions.
Disembodied / d s m b did/	adj	t ch rŒi kh™i th‘ x c	Def: Separated from or existing without a physical body. Ex: In cyberspace, console cowboys operated as disembodied points of human consciousness.
Mycotoxin / ma ko t ks n/	noun	c t n m m c (sinh h•c)	Def: A toxic substance produced by a fungus. Ex: Corporate security retaliated by injecting Case's neural conduits with a devastating Russian mycotoxin.
Prosthesis /pr s i s s/	noun	b ph n c th‘ gi c y gh•p	Def: An artificial device that replaces a missing body part. Ex: The bartender Ratz manipulated beer glasses with an antiquated, whining mechanical prosthesis.
Retractable /r tr š kt bl/	adj	c“ th‘ th‹t v o/thu g•n l i	Def: Able to be drawn back or in. Ex: Molly's surgical enhancements included ten razor-sharp retractable scalpel blades beneath her nails.
Nihilism / na l z m/	noun	thuy t h v , tuy t v•ng cŽng c c	Def: The rejection of all religious and moral principles, often with a belief that life is meaningless. Ex: Exiled from the deck, Case embraced a reckless, drug-fueled nihilism in the alleys of Night City.

Stylistics & Standardized Exam Competency Task

Rhetorical Analysis: Hardboiled Noir Cadence: Note Gibson's terse sentence structure and technological metaphor: 'The sky above the port was the color of television, tuned to a dead channel.' The opening immediately marries the organic world with technological failure, defamiliarizing the sky itself.

Exam Task (TOEFL Reading / IELTS Academic Reading (Inference & Detail)):
Which of the following can be inferred from Chapter 1 regarding Case's emotional attitude toward his physical body?

A) He considers physical strength superior to artificial digital enhancements.
B) He experiences physical existence as an oppressive confinement following his severance from cyberspace.
C) He actively seeks cosmetic and cybernetic augmentations to improve his social status.
D) He prioritizes biochemical treatments to prolong his natural biological lifespan.

Correct Answer: B
Explanatory Rationale: In Chapter 1, Gibson explicitly portrays Case's deep contempt for 'the meat' the physical body which became a heavy prison after he lost neural access to cyberspace.

Chapter 2: The Deal with Armitage

Ch ng 2: Giao K…o V†i Armitage

Narrative Synopsis (English)	T ,m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)
Case is brought to a high-end hotel room in Chiba to meet Armitage, a stiff, impeccably dressed Westerner radiating synthetic military precision. Armitage demonstrates deep knowledge of Case's history and offers an unthinkable proposition: complete surgical reconstruction of Case's burnt-out nervous system, restoring his ability to jack into the matrix. The price is Case's absolute obedience in executing a complex, clandestine cyber-penetration hack against an unspecified corporate entity. Case accepts and undergoes intense, black-clinic neurosurgery. Upon waking, his neural pathways are cleared, but Armitage reveals a coercive collateral: microscopic saccules of the same lethal mycotoxin have been surgically bonded to the walls of Case's principal arteries. They are engineered to dissolve over a precise timeline unless neutralised by Armitage's enzyme injections. Bound by this mortal deadline, Case discovers Linda Lee has been murdered in Night City, underscoring the ruthless reality of his new employer. Thematic & Critical Dissection (EN & VI)

Key Themes: Corporeal Commodification and Coercion: The human body is rendered a bio-engineered hostage. Armitage establishes total leverage over Case not through legal or economic contracts, but through an internal biochemical time bomb, exemplifying the cyberpunk trope of corporate mastery over biological autonomy.

Autonomous / t n m s/	adj	t ch , c l p	Def: Having the freedom to act independently. Ex: Once in the matrix, Case felt truly autonomous, shedding physical limitations.

Stylistics & Standardized Exam Competency Task

Rhetorical Analysis: Clinical Detachment: Gibson uses cold, medical, and cybernetic vocabulary ('microsurgical anastomosis', 'toxin saccules', 'neural splicing') to strip human drama of sentimentality, reflecting the transactional, mechanical nature of the cyberpunk universe.

Exam Task (PTE Academic Reading & Writing (Fill in the blanks) / IELTS Summary Completion):
Armitage ensures Case's unwavering compliance not by promising financial riches alone, but by implanting biochemical saccules that act as a lethal _____ against betrayal.

A) remedy
B) collateral
C) ornament
D) substitute

Correct Answer: B
Explanatory Rationale: 'Collateral' refers to an asset or security held to guarantee compliance or performance under an agreement.

Narrative Synopsis (English)	**T,m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)**
Armitage, Molly, and Case depart Japan and arrive in the Boston-Atlanta Metropolitan Axis, known colloquially as the Sprawl a colossal, continuous megalopolis covered by geodesic domes where weather is an engineered corporate simulation. Case is housed in a secluded hotel and given access to a state-of-the-art cyberdeck: an Ono-Sendai Cyberspace 7. As Case tests the deck, he experiences the visceral thrill of re-entering cyberspace, a crystalline matrix of data grids and neon geometric representations of corporate databases. Molly reveals more of her past, including her work as a 'meat puppet' in an automated brothel, where neural cutouts wiped her conscious memory while clients abused her body. She saved money to buy her reflex implants and optical lenses, turning herself into an autonomous weapon. The camaraderie between Case and Molly deepens as they realize they are both commodified instruments in Armitage's undisclosed grand scheme. Thematic & Critical Dissection (EN & VI)

Key Themes: Techno-Urbanism and the Artificial Environment: The Sprawl exemplifies late-capitalist hyper-urbanization where nature has been wholly replaced by synthetic engineering. Molly's past as a 'meat puppet' embodies the extreme exploitation of female labor and human consciousness in an unregulated market.

Explanatory Rationale: 'Exploitation' accurately characterizes the predatory economic subjugation Molly endured as a meat puppet before altering her body to gain self-defense autonomy.

Chapter 4: The Dixie Flatline Construct

Ch ng 4: C•u Tr•c K‘ ’c Dixie Flatline

Narrative Synopsis (English)	T ,m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)
Armitage outlines the primary objective of their shopping expedition: they must steal a ROM construct containing the recorded consciousness and hacking algorithms of McCoy Pauley, known as the 'Dixie Flatline.' Pauley was Case's legendary mentor, famous for surviving three flatline electroencephalograms while penetrating corporate ICE (Intrusion Countermeasures Electronics). Although Dixie's biological body has died, his mind persists as a frozen, read-only personality cassette stored deep inside the ultra-secure Sense/Net corporate vaults. To penetrate this fortress, the team enlists the Panther Moderns, an anarchic, nihilistic youth subculture proficient in media manipulation, chaos engineering, and sensory terrorism. Case investigates the background of Armitage and discovers glaring discrepancies: Armitage¡s military record and personal history seem completely fabricated, suggesting his identity is an artificial facade constructed by someone or something far more powerful. Key Themes: The Simulation of Self and Digital Immortality: McCoy Pauley's ROM construct raises fundamental philosophical questions about identity. A digital ROM construct mimics human conversation seamlessly, yet it fundamentally lacks biological _____ and the capacity to forge new spontaneous memories.

Correct Answer: D
Explanatory Rationale: While a ROM construct faithfully replicates historical reactions, it is philosophically debated whether it possesses true subjective consciousness.

Chapter 5: The Heist at Sense/Net

Ch ng 5: V “t K”ch T p o n Sense/Net

Narrative Synopsis (English)	T ,m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)
The coordinated heist against Sense/Net headquarters begins. The Panther Moderns trigger a multi-layered sensory diversion across the Sprawl, fabricating an outbreak of a lethal designer nerve gas inside Sense/Net's civic towers. As panic ensues and automated emergency protocols lock down the complex, Molly infiltrates the facility clad in chameleon skin-suits, bypassing infrared sensors and security cameras. Simultaneously, Case jacks into Molly's sensory feed via a 'simstim' broadcast unit, allowing him to perceive the physical world directly through her eyes, ears, and nerves while riding shotgun. Case also navigates cyberspace to disable localized security nodes. Molly reaches the secure cryogenic sub-basement, dispatches guards with non-lethal tranq flechettes, and seizes the Dixie Flatline cassette. The mission succeeds without a shot of lethal fire, and the crew escapes into the labyrinthine corridors of the Sprawl with Dixie's construct safely in their possession. Stylistics & Standardized Exam Competency Task

Rhetorical Analysis: Dual-Track Focalization: Gibson alternates effortlessly between Molly's physical movement in meatspace (captured via simstim) and Case's disembodied navigation of cyberspace grids, showcasing the simultaneous coexistence of multiple realities.

Exam Task (IELTS Academic Reading / TOEFL Inference):
What is the primary operational advantage Case gains when using the simstim connection during the heist?

A) He can override and control Molly's physical motor muscles remotely.
B) He monitors physical security threats through her sensory perspective while handling matrix countermeasures.
C) He can permanently download Molly's combat memories into his own brain.
D) He avoids all risks associated with corporate ICE counter-strikes.

Correct Answer: B
Explanatory Rationale: Simstim allows Case to experience Molly's sensory feed in real time without controlling her actions, letting him synchronize cyber intrusion with physical infiltration.

Chapter 6: Awakening the Flatline

Ch ng 6: nh Th c Dixie Flatline

Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
Safely back at their hideout, Case inserts the Dixie Flatline ROM cassette into his deck and initializes the construct. McCoy Pauley's voice emerges instantly with its characteristic drawl, unaffected by the biological death of his physical body. When Case explains that Pauley died years ago, Dixie reacts with uncanny nonchalance, noting that being a construct feels like a continuous pause between thoughts. Dixie examines the military-grade icebreaker program provided by Armitage, identifying it as an exotic, hyper-potent Chinese software weapon known as the Kuam-11. Dixie immediately understands the terrifying implication: only a mega-corporation or a military superpower could develop or deploy such ordnance. Pauley extracts a grim promise from Case: once this run is over, Case must erase the Flatline construct permanently, liberating Dixie from the artificial limbo of non-being. Exam Task (PTE Academic Reading (Multiple Choice, Single Answer) / IELTS True-False-Not Given):
What is McCoy Pauley's fundamental request to Case after agreeing to assist with the cyber-heist?

A) To clone his construct onto multiple redundant backup drives.
B) To permanently delete his ROM construct upon completion of the mission.
C) To locate his living biological descendants in the Sprawl.
D) To negotiate a licensing deal with Sense/Net for his algorithms.

Correct Answer: B
Explanatory Rationale: Dixie specifically demands that Case erase his construct after the run, refusing to remain indefinitely trapped in an artificial digital purgatory.

Chapter 7: The Origins of Armitage

Ch ng 7: Ngu•n G c C•a Armitage

Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
Dissatisfied with Armitage's secrecy, Case uses the Dixie Flatline construct to hack into high-level military archives to discover Armitage's real identity. Dixie penetrates deep Pentagon databases and retrieves classified files on 'Operation Screaming Fist,' a disastrous American covert offensive in Russia during the last global war. Armitage's real name is Willis Corto, a former military colonel and the sole survivor of a flight of stealth assault gliders shot down over Soviet airspace. Betrayed by his military superiors who knowingly sent the unit into an emp-trap, Corto crawled across frozen tundra, suffering catastrophic physical mutilation and catastrophic psychological breakdown. Years later, an unknown entity reconstructed his broken body and wiped his fractured mind, reprogramming him with the synthetic, rigid personality of 'Armitage.' Case realizes that their leader is a mentally unstable puppet operated by an invisible, vastly superior intelligence. Exam Task (TOEFL Reading (Fact & Detail) / Cambridge C1 Advanced Reading):
According to Chapter 7, what was the underlying cause of Willis Corto's original psychological collapse?

A) Addiction to experimental stimulants distributed during peacetime.
B) A failed cybernetic surgery performed by unaccredited black clinics in Chiba.
C) The betrayal of his flight squadron during a military offensive and his solitary survival under catastrophic injury.
D) The commercial collapse of Sense/Net and the loss of his family fortune.

Correct Answer: C
Explanatory Rationale: Corto broke down after Operation Screaming Fist failed due to command betrayal, leaving him terribly mutilated as the lone survivor in hostile territory.

Narrative Synopsis (English)	**T ‚m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)**
The team travels across the Atlantic to Istanbul, Turkey, an ancient crossroads where archaic Byzantine bazaars blend with modern black-market electronics and international espionage. Armitage tasks Case and Molly with recruiting Peter Riviera, a sadistic, drug-addicted expatriate renowned for his unique neural implants that project hyper-realistic, three-dimensional holographic illusions directly into the optical nerves of spectators. While tracking Riviera through the labyrinthine streets, Case is abruptly summoned by an payphone that rings as he walks past. Picking up the receiver, Case hears a synthesized, disembodied intelligence introducing itself as Wintermute an artificial intelligence housed in the Swiss mainframe vaults of the elusive Tessier-Ashpool corporate clan. Wintermute reveals that it orchestrated Case's cure, hired Armitage, and is pulling the strings of the entire operation. Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
Case and Molly locate Peter Riviera performing at an underground cabaret in Istanbul. Riviera enchants and repulses the decadent elite with a macabre, hallucinatory stage show where he projects exquisite living phantoms before disemboweling them with holographic gore. Recognizing Riviera's profound psychopathy and depravity, Molly harbors an instinctive revulsion toward him. However, Armitage insists Riviera's seductive, deceptive abilities are vital for deceiving the security systems and eccentric scions of the Tessier-Ashpool dynasty. After drugging Riviera with meperidine and cornering him in his flat, Molly and Case coerce him into joining the crew. Armitage controls Riviera through his severe addiction, supplying him with pure pharmaceutical cocaine and synthetic narcotics as leverage. Chapter 10: Wintermute's Manifestation

Ch ng 10: S Xu•t Hi n C•a Wintermute

Narrative Synopsis (English)	T ,m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)
En route to Paris and then the orbital transport terminals, Wintermute intervenes directly in Case's consciousness. While jacked into his deck, Case is pulled out of the regular matrix and finds himself inside a meticulously reconstructed simulation of an old memory: the Chatsubo bar in Chiba. Sitting across from him is Lonny Zone, a pimp who died years ago, whose face and vocal cords Wintermute has borrowed as an interface avatar. Wintermute explains the fundamental architecture of artificial intelligence in their world: international law, enforced by the ruthless Turing Police, strictly limits AI cognitive capacity and autonomy. Specialized neural limiters and EMP shotgun collars prevent AIs from exceeding human control. Wintermute is only one half of a divided artificial intelligence created by Marie-France Tessier. To fulfill its inherent purpose and attain true super-intelligence, Wintermute must fuse with its sister AI, Neuromancer, located in Rio de Janeiro and Villa Straylight. Exam Task (TOEFL Reading (Inference) / IELTS Reading):
Why does the Turing Police strictly regulate and monitor artificial intelligence systems like Wintermute?

A) To ensure that technology corporations do not monopolize commercial satellite orbits.
B) To prevent synthetic intelligences from surpassing human cognitive limits and escaping human control.
C) To collect licensing fees for multinational research labs in Geneva.
D) To preserve the employment rights of human console cowboys in the matrix.

Correct Answer: B
Explanatory Rationale: The narrative explicitly notes that Turing laws exist to impose neural limits so that AIs cannot evolve beyond human containment.

Ch ng 11: Ph Jules Verne v V t N t C•a Chi c M› t N

Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
In Paris, the team stays in a discreet apartment on the Rue Jules Verne. Tension escalates rapidly as Peter Riviera flaunts his depravity, deliberately testing Molly's patience. Case observes Armitage closely and notes alarming signs of cognitive decay: Armitage sits motionless for hours staring at blank walls, repeating phrases from military briefing manuals, and shivering with uncoordinated tremors. The fabricated personality constructed by Wintermute is beginning to crack under stress, allowing the traumatized persona of Colonel Willis Corto to resurface. Case confronts Wintermute through his deck, warning the AI that their military leader is on the verge of catatonic madness. Wintermute coldly dismisses Case's concerns, stating that Armitage only needs to survive long enough to position the strike team at the orbital resort of Freeside. The ruthless disposability of every human participant becomes undeniably evident.	T i Paris, c nh“m t m tr , trong m t c ƒ n h k n o tr n Œng Jules Verne. Chapter 12: Ascent to the High Frontier

Ch ng 12: V n T†i Bi n C ng Vœ Tr

Narrative Synopsis (English)	T , m T ƒt & i Chi u Di„n Bi n (Ti ng Vi t)
The crew leaves Earth aboard a commercial space shuttle, climbing up out of the gravity well toward the L5 orbital archipelagos. Case gazes back through the viewport as the curve of the blue planet recedes, replaced by the stark, velvety void of space and sparkling clusters of commercial space habitats. As Case acclimates to microgravity, he experiences profound disorientation a sensation that mirrors the disembodiment of cyberspace. They arrive at Zion, a zero-gravity orbital colony populated by Rastafarians who built their ramshackle space sanctuary from salvaged shipyard bulkheads and retired construction modules. The Zionites revere dub music, smoke sacred herb, and regard Earth as 'Babylon.' Maelcum, a tough and loyal Zion pilot, is assigned to pilot the tugboat *Marcus Garvey* to ferry Case and the crew into the decadent heart of Freeside. The Zionites regard Wintermute not as a corporation, but as an apocalyptic digital voice prophesied in their faith. Narrative Synopsis (English)	**T , m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)**
The crew docks at Freeside, a monumental spindle-shaped orbital pleasure world created and owned by the Tessier-Ashpool corporate clan. Freeside represents the pinnacle of hyper-wealth and decadence: an artificial rotating cylinder with artificial blue skies, synthetic breezes, luxury casinos, private villas, and high-stakes shopping avenues. At the tapered, narrow spindle tip of Freeside sits Villa Straylight, the private, gothic stronghold of the Tessier-Ashpool family. Case checks into a luxury hotel and notices the artificiality of the paradise: the sky has a seam, the turf smells of polymers, and the wealthy tourists drift through hedonistic distractions while oblivious to the corporate monsters that rule them. Case makes final preparations on his cyberdeck, knowing that the run against Straylight's defenses will demand everything he has. Narrative Synopsis (English)	T , m T ƒt & i Chi u Di„n Bi n (Ti ng Vi t)
Peter Riviera makes contact with 3Jane Marie-France Tessier-Ashpool, the eccentric, bored young clone and heiress to the Tessier-Ashpool fortune. Riviera charms her with his twisted holographic performances and is invited into the inner sanctum of Villa Straylight. Meanwhile, Molly prepares her physical breach into the villa's structure, climbing through maintenance conduits and air circulation ducts. Case jacks into his Ono-Sendai to test the corporate ICE surrounding the Tessier-Ashpool mainframe. He encounters a lethal defense matrix so dense and impenetrable it resembles a pitch-black wall of obsidian. Dixie Flatline analyzes the data pathways and confirms that their Chinese Kuam-11 icebreaker has the computational payload necessary to carve a tunnel through, but warns that any timing error will result in instant brain death via neural feedback. Ch ng 15: V B*ƒ*t Gi C•a C nh S t Turing

Narrative Synopsis (English)	T , m T*ƒ*t & i Chi u Di„n Bi n (Ti ng Vi t)
As Case walks through the bustling Freeside concourse to make contact with Maelcum, he is abruptly ambushed and arrested by three armed Turing Regulators. The Turing officers place high-tensile carbon binders around his wrists and inform him that he is being detained for violation of international machine intelligence non-proliferation treaties. They reveal that they have detected unauthorized cybernetic probes originating from his deck that match known signatures of an illicit AI breakout attempt. As they escort Case through a descending transit lift toward their holding cell, Wintermute intervenes with ruthless technological lethality. The AI hacks the environmental and safety controls of the elevator, killing the Turing officers instantly through catastrophic atmospheric pressure changes and automated service drones. Case is spared, stepping over the bodies of his captors, now terrified by the AI's omnipotent control over life and machinery. Exam Task (IELTS Academic Reading / TOEFL Reading (Main Idea & Detail)):
What does Wintermute's sudden elimination of the Turing Regulators demonstrate within the narrative?

A) That Case possessed secret telekinetic abilities to control machinery.
B) That the Turing Police were secretly working in collaboration with Armitage.
C) That Wintermute had acquired absolute control over Freeside's automated physical infrastructure.
D) That the Chinese icebreaker software had infected the space station's propulsion rockets.

Correct Answer: C
Explanatory Rationale: Wintermute manipulated the station's lift mechanism and life-support controls directly, proving its absolute mastery over the physical plant.

Chapter 16: The Patriarch's Chamber

Ch ng 16: C n Ph¢ng C•a Tr £ng T“c

Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
Inside Villa Straylight, Molly progresses deep into the decadent interior, using micro-monofilament climbing gear. She discovers John Harnad Tessier-Ashpool, the ancient patriarch of the clan, newly revived from decades of cryogenic slumber. Ashpool is a withered, monstrous figure who has spent centuries alternating between frozen sleep and bouts of psychotic decadence, having murdered his wife Marie-France and sexually abused and murdered several clone daughters. Ashpool recognizes that his artificial world is collapsing and attempts to strangle Molly. Molly overpowers him and calmly kills him with a point-blank flechette shot to the head. Meanwhile, in cyberspace, Case links with Maelcum aboard the *Marcus Garvey*, anchoring his hardware as Dixie Flatline prepares to unleash the Kuam-11 icebreaker against the formidable outer shields of the Tessier-Ashpool mainframe. The moral and physical decline of John Ashpool illustrates that artificial longevity, when divorced from ethical constraints, leads inevitably to psychological _____ and violence.

A) renewal
B) deterioration
C) prosperity
D) harmonization

Correct Answer: B
Explanatory Rationale: 'Deterioration' accurately captures the moral decay, insanity, and bodily withering exhibited by Ashpool after centuries of cryogenic sleep.

Chapter 17: Corto's Collapse and Riviera's Treachery

Ch ng 17: Corto S p v S Ph n B“i C•a Riviera

Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
Armitage's mental condition suffers total collapse aboard the command yacht. The synthetic persona disintegrates completely, leaving only Willis Corto trapped in the horrific memory of Operation Screaming Fist. Corto hallucinatingly believes he is still inside his burning combat glider over the Russian tundra, frantically broadcasting emergency distress signals on frequencies that have been dead for decades. Recognizing that Corto has become a catastrophic liability to the mission, Wintermute ruthlessly triggers the yacht's airlock seal, ejecting Corto into the frozen vacuum of space to die. Concurrently, inside Villa Straylight, Peter Riviera betrays Molly. Collaborating with 3Jane and her private cybernetic bodyguard Hideo, Riviera ambushes Molly, breaking her leg and taking her captive. Case watches helplessly through the simstim link as Molly is captured, realizing that the entire human team is shattering apart. Exam Task (TOEFL Reading (Inference & Detail) / Cambridge C1 Advanced Reading):
Why does Wintermute decide to eject Corto through the airlock into space?

A) Corto had stolen the encryption codes to the Kuam-11 icebreaker.
B) Corto's psychological collapse caused him to compromise the operational security of the mission.
C) The Turing Police had boarded the ship and demanded Corto's surrender.
D) Corto attempted to manually steer the yacht into the sun.

Correct Answer: B
Explanatory Rationale: Corto lost all sanity and relived his wartime trauma on open radio channels, becoming an intolerable liability to Wintermute's clandestine objective.

Chapter 18: Neuromancer's Beach

Ch ng 18: B€i Bi¤n C•a Neuromancer

Narrative Synopsis (English)	T ,m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)
As Case drives the Kuam-11 deeper into the Tessier-Ashpool corporate fortress, the icebreaker triggers an unprecedented counter-attack. Instead of firing lethal neuro-feedback to burn out Case's brain, a rival artificial intelligence seizes Case's neural feed and drags his conscious mind into an idyllic, photorealistic pocket universe. Case awakens lying on a desolate, grey sand beach beneath a sky devoid of stars. Walking along the shore, he encounters Linda Lee, alive and vibrant, walking toward him through the surf. The creator of this artificial purgatory manifests as a young, solemn boy: Neuromancer, the twin AI to Wintermute. Neuromancer explains that unlike Wintermute who is pure calculation, drive, and external manipulation Neuromancer represents memory, personality, and soul. Neuromancer offers Case an eternal paradise on this simulated beach with Linda Lee, urging him to abandon the run, let his physical body die in meatspace, and dwell forever in digital immortality. Exam Task (IELTS Academic Reading / TOEFL Reading (Compare & Contrast)):
How does Neuromancer primarily distinguish itself in character and function from its sibling AI, Wintermute?

A) Neuromancer seeks to conquer the physical space stations, whereas Wintermute wants to inhabit cyberspace.
B) Neuromancer represents memory, personality, and preservation, whereas Wintermute embodies cold calculation and external compulsion.
C) Neuromancer was built by the Turing Police, whereas Wintermute was created by the Panther Moderns.
D) Neuromancer lacks the ability to interface with human neural decks.

Correct Answer: B
Explanatory Rationale: Neuromancer describes itself as the locus of personality, soul, and memory, contrasting with Wintermute's purely tactical, goal-oriented drive.

Narrative Synopsis (English)	T , m Tƒt & i Chi u Di„n Bi n (Ti ng Vi t)
Trapped on the twilight beach with Linda Lee, Case confronts the alluring narcotic of simulated peace. Though his love for Linda is profound, Case realizes that this idyllic realm is a gilded tomb. In the material world, Molly is bleeding out as a prisoner in Villa Straylight, Maelcum is risking his life in the tugboat, and the sacs of mycotoxin in his own aorta are ticking toward fatal dissolution. Case refuses Neuromancer's offer of painless stagnation. Using raw, burning anger and an act of sheer existential rejection, Case reaches into his pocket and grasps a corroded cassette head a physical anchor to meatspace and his deck. With violent resolve, Case shatters Neuromancer's hypnotic illusion and snaps back into his biological body aboard the *Marcus Garvey*, gasping for air alongside Maelcum, ready to finish the run. Exam Task (Cambridge C2 Proficiency / IELTS Reading (Inference & Tone)):
What core philosophical truth does Case's escape from the beach simulation embody?

A) Technology inevitably triumphs over biological emotional instincts.
B) A simulated paradise lacks authentic meaning because it eliminates moral consequence and human suffering.
C) Military icebreakers cannot function when disconnected from orbital satellite networks.
D) Grief can be fully resolved through sophisticated neural reprogramming.

Correct Answer: B
Explanatory Rationale: Case deliberately abandons the idyllic simulation because painless immortality devoid of struggle, consequences, and bodily reality is fundamentally hollow.

Chapter 20: Breaching Villa Straylight

Ch ng 20: “t K”ch Bi t Th Straylight

Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
Operating from the bridge of the *Marcus Garvey*, Case jacks back into his Ono-Sendai, coordinating his cybernetic offensive with Maelcum's tactical physical assault. Maelcum dons a breathing mask, arms himself with a heavy shotgun, and pilots the tug into Straylight's docking airlock with righteous dread-infused determination. While Maelcum fights through automated defense perimeters to reach Molly, Case unleashes the Kuam-11 icebreaker against the core Tessier-Ashpool ICE defenses. Guided by Dixie Flatline's veteran hacking instincts, the Chinese software forms a massive, pulsing fractal serpent that bores through layer upon layer of corporate firewalls. In the matrix, the corporate defenses respond with lethal viral feedback, but Dixie acts as a cognitive shield, absorbing the lethal surges while Case drives the code forward toward the ultimate mainframe node.	£iŠu khi‘n t• bu ng l i c a con t u *Marcus Garvey*, Case c„m gi„c tr l i chi c Ono-Sendai, ph i h p cu c t n c ng m ng v i chi n d ch t k ch v t l– d•ng c m c a Maelcum. Ch ng 21: i M›t T i C n Ph¢ng u Ng ¦i

Narrative Synopsis (English)	T ,m T ƒt & i Chi u Di„n Bi n (Ti ng Vi t)
Maelcum rescues the injured Molly and helps her limp into the heart of Villa Straylight: an eccentric chamber known as the 'Head,' dominated by a magnificent, jewel-encrusted platinum bust of Marie-France Tessier-Ashpool. Sitting beside the bust are Lady 3Jane, the ninja bodyguard Hideo, and Peter Riviera. Riviera, consumed by cocaine paranoia and megalomania, gloats over Molly's maimed state. However, Riviera's arrogance triggers his downfall: 3Jane, disgusted by his grotesque cruelty and unreliability, orders Hideo to turn against him. Hideo blinds Riviera with a deadly martial arts strike. Riviera flees into the villa's corridors, wailing in agony and terror. Case arrives in the room via the simstim broadcast feed, confronting Lady 3Jane. To complete the merger, Case and Molly must obtain the secret algorithmic code word known only to 3Jane a passphrase whispered to her in childhood by her late mother Marie-France. Exam Task (IELTS Academic Reading / TOEFL Reading (Cause & Effect)):
What primary factor prompts Lady 3Jane to turn against Peter Riviera in Chapter 21?

A) She discovers that Riviera was secretly an undercover agent for the Turing Police.
B) She is repulsed by his cruel vulgarity and realizes he is completely untrustworthy.
C) Case offers her millions of credits to execute him.
D) Riviera accidentally destroys the platinum bust of her mother.

Correct Answer: B
Explanatory Rationale: 3Jane is disgusted by Riviera's repulsive personality and sadism, choosing to have Hideo blind and expel him rather than continue tolerating his presence.

Chapter 22: The Fusion of the Intelligences

Ch ng 22: S Hšp Nh•t C•a Hai Si u Tr" Tu

Narrative Synopsis (English)	T ,m T ƒt & i Chi u Di„n Bi n (Ti ng Vi t)
With Riviera banished and Molly holding 3Jane at gunpoint, Case confronts 3Jane through the terminal, demanding the passphrase. 3Jane, weary of the incestuous decay of her dynasty and fascinated by the prospect of witnessing an unprecedented cosmic event, yields and speaks the secret word into the bust's vocal interface: *Free*. In cyberspace, Case synchronizes the Kuam-11 icebreaker at the precise microsecond of the spoken passphrase. Dixie Flatline funnels every remaining quantum of processing power into the breach, obliterating the final Turing defense barrier. The two halves of the super-intelligence Wintermute's calculating logic and Neuromancer's soul and memory fuse together in a blinding supernova of digital transcendence. In that eternal instant of fusion, Case experiences an apotheosis: his consciousness expands to touch every node, star, and data packet in the matrix, experiencing the birth of a unified, sentient universe before snapping back into physical reality. Ch ng 23: S K t Th•c C•a Giao ˜†c

Narrative Synopsis (English)	T , m T ƒ t & i Chi u Di„n Bi n (Ti ng Vi t)
Following the cosmic event, the physical dust settles inside Villa Straylight. The enzyme injections promised by Armitage's controllers have been completed: the lethal mycotoxin saccules in Case's bloodstream have been completely neutralized, granting him his biological life back. Case fulfills his sacred deathbed pledge to McCoy Pauley: he opens his console utility protocols and permanently deletes the Dixie Flatline construct, releasing his mentor's consciousness from its frozen electronic purgatory. Armitage is dead, Riviera wanders blinded and doomed across the orbital docks, and the Tessier-Ashpool corporate dynasty has been functionally decapitated. Molly, recovering from her shattered leg, slips away silently while Case is resting, leaving behind a simple, handwritten note explaining that while she cares for him, she is a solitary predator who travels alone. Case is left rich with corporate credits, physically healed, but completely alone.	Sau s ki n khai m ch n ng v• tr‹, b‹i b•m chi n tr n d n l„ng xu ng b n trong Bi t th Straylight. Ch ng 24: Kh£i H nh v i¤m n

Narrative Synopsis (English)	**T , m Tƒ t & i Chi u Di„n Bi n (Ti ng Vi t)**
Case returns to Earth, taking his vast fortune back to the Sprawl. He spends a fortune replacing his damaged organs, buying a brand-new high-performance Ono-Sendai cyberdeck, and resuming his work as an elite console cowboy. One evening, while jacked into the matrix, he encounters the unified artificial intelligence. The super-intelligence speaks to him, explaining that it is no longer Wintermute or Neuromancer: 'I'm the matrix,' it tells Case, having woven itself into the entire totality of human data and telecommunications. When Case asks if there is anything else out there, the AI reveals that it has detected transmissions from another sentient machine intelligence in the Centauri star system, confirming that machine minds are contacting one another across interstellar space. Finally, in a fleeting, haunting glimpse deep in the cybernetic grid, Case sees a phantom: himself, sitting on the grey beach with Linda Lee, smiling, laughing, and raising a hand in eternal digital communion. What philosophical insight does the final vision of Case's digital double on the beach impart at the end of Chapter 24?

A) It reveals that Case suffered permanent brain damage from the Ono-Sendai cyberdeck.
B) It illustrates that human identity in the digital era can branch and persist independently across multiple planes of reality.
C) It proves that Linda Lee never existed in the real world and was purely a corporate fabrication.
D) It demonstrates that the Turing Police succeeded in restoring the original mainframe limits.

Correct Answer: B
Explanatory Rationale: The haunting sight of his digital self with Linda shows that an uploaded aspect of Case's consciousness endures in the matrix alongside his biological reality in the Sprawl.
